

Medical Statement for Meal Modifications in School Nutrition Programs

This form applies to requests for meal modifications for children participating in the U.S. Department of Agriculture's (USDA) school nutrition programs. School nutrition programs include the National School Lunch Program (NSLP), School Breakfast Program (SBP), Afterschool Snack Program (ASP), Seamless Summer Option (SSO) of the NSLP, Fresh Fruit and Vegetable Program (FFVP), and Child and Adult Care Food Program (CACFP) At-risk Supper Program implemented in schools. Schools and institutions are required to make reasonable meal modifications for children whose physical or mental impairment restricts their diet.

Note: The USDA requires that the medical statement includes: 1) information about the child's physical or mental impairment that is sufficient to allow the school food authority (SFA) to understand how the physical or mental impairment restricts the child's diet; 2) an explanation of what must be done to accommodate the child's disability; and 3) if appropriate, the food or foods to be omitted and recommended alternatives. Schools and institutions should not deny or delay a requested meal modification because the medical statement does not provide sufficient information. When necessary, schools and institutions should work with the child's parent or guardian to obtain the required information. For more information, please reference USDA's 2017 version of "Accommodating Children with Disabilities in the School Meal Programs."
